

0.1 newpainters: The Discretized Painter's Data of de Piles

Description

The original painters data contain the subjective assessment, on a 0 to 20 integer scale, of 54 classical painters. The newpainters data discretizes the subjective assessment by quartiles with thresholds 25%, 50%, 75%. The painters were assessed on four characteristics: composition, drawing, colour and expression. The data is due to the Eighteenth century art critic, de Piles.

Usage

```
data(newpainters)
```

Format

A table containing 5 variables ("Composition", "Drawing", "Colour", "Expression", and "School") and 54 observations.
