

0.1 immigration: Individual Preferences Over Immigration Policy

Description

These five datasets are part of a larger set of 10 multiply imputed data sets describing individual preferences toward immigration policy. Imputation was performed via Amelia.

Format

Each multiply-imputed data set consists of a table with 7 variables ("ipip", "wage1992", "prtyid", "ideol", "gender") and 2,485 observations. For variable descriptions, please refer to Scheve and Slaughter, 2001.
